Court Sends Failure to Pay Release Notification (DMV905)

Exchange Description

Trial courts use this California judicial branch XML schema-based data exchange to send a failure to pay release abstract (DD4) to the California Department of Motor Vehicles (DMV). The courts report a person's successful payment of an assessed fine relating to a citation where the fine was previously reported as a Failure to Pay (FTP) or the payment qualifies as an installment payment. In other words, the court reports that the license hold is to be released, where the fine was previously reported as FTP.

- The notification message contains the FTP release abstract information (e.g., participant's driver's license number, sections violated).
- The response message is sent by the DMV upon successful receipt of the notification message and contains the FTP release abstract response (e.g., participant's driver's license number and message code).

This data exchange may be used when a case participant with a failure to pay hold on their license subsequently pays the fine in full.

Business Response Exchanges

The business response refers to any subsequent exchanges that may occur as a direct result of this exchange.

- There is no business response to this exchange.

Error Handling

If the integration partner does not successfully receive and process the incoming message, the trial court will receive an error message with an error code and error reason.

PROBABLE INTERESTED INTEGRATION PARTNERS

- California Department of Motor Vehicles

RELATED EXCHANGES

Related data exchanges are preceding or subsequent data exchanges that may be used by an integration partner as part of the overall business process related to this exchange.

- Court Sends Failure to Pay Hold Notification (DMV904), which a court uses if a defendant fails to pay a court ordered obligation, after which the courts will proceed with the release notification.

For more information about this and other data exchanges, contact integrationpartners@jud.ca.gov

Additional Information

- A single exchange message is sent for each DMV failure to pay release notification request.
- The response to this exchange message only occurs after receipt and processing by the integration partner. Both the success and error response messages must be sent as separate messages using the formats defined in this exchange.
